New: (20 KD)

1- Add All Products in the Browse All Categories drop down

2- Add a section to show products like new arrival or promotion something

3- Add a new page 404 in the website in case user trying to visit wrong url should land to this page

4- Remove noindex tag from the robot.text file

5- Duplicate url check (www.littleskw.com) must take to https://littleskw.com

6- Share this must have instagram icon

7- On order list screen the status must be clickable to change the status

8- Add one more payment method (Apple or Google Pay) which will take the user to the upayment payment method selection screen)

Fix:

1- Footer Faq in capital

2- Mobile View Google Login button check

3- In Arabic view the ad banners move the text to right aligned, there is some space

4- KWD to arabic

5- Favicon icon to be changed it is very blur

6- the center ad banner opens english product view

7- The ad banner on right side bar fix the text on it, it must look like the banner in home page

8- The status must be PAID (not completed) if the order is newly placed and paid
