PROJECTS

Intercity Carpooling System
- A dynamic system which based on two underlying sources of information: which includes route . Announcement by the user and route selection and registration by passengers. Complete this as my final year project in University, currently in local host but will be on server after testing

Asif Super Store
- asifsuperstore.com.pk
- E-commerce website for general, grocery etc items
- Worked on this project as a team member on backend

Advance Computer Technology. --actech.pk

CONNECT
- connectkw.co.
- Worked as Full Stack Developer.
- A website for finding and posting jobs, Site has two sections one for jobseeker where we gather info of user and a cv is generated which admin can see, 2nd section is for employer where user create account and post about job by filling form these job posts received by admin and then refer jobseeker to that employee on that particular post.

Artistic
- artistic.global.
- Completed this project recently as team lead.
- An Event management system where admin can post event with venue and user can book the seat for event.
